Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered. See the references listed on pg. 2 of the specification, for example.

Specification

2. The disclosure is objected to because of the following informalities: the phrase "a fist type" in line 12 from the bottom of page 7 should be changed to --a first type--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 6447009 to McMillan.

Re: claim 1. McMillan shows in figure 3 a hybrid vehicle slip stop device

comprising a plurality of different types of slip stop means 20 and 28 for preventing slip of the vehicle by increasing the frictional resistance relative to a road surface on which the vehicle is traveling.

Re: claim 2. McMillan shows in figure 3 wherein a road surface condition detecting means or the means that determines whether the adhesive molten liquid 30 is sufficiently cool for detecting the road surface condition, wherein one of the plurality of different types of slip stop means 28 is structured to be selected and actuated according to the road surface condition detected by the road surface condition detecting means, particularly when it is determined that the adhesive molten liquid 30 is not sufficiently cooled.

Re: claim 3. McMillan shows in figure 3 wherein the plurality of different types of slip stop means 20 and 28 are provided for the same one tire of the vehicle or particularly the back wheel 18 as shown in figure 3.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents: 6371532 to Skarie et al., 5851086 to Kurasako, 5582441 to Frost, and 4316625 to Goon et al. teach the use of slip stop devices including material dispensers.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melody M. Burch whose telephone number is 571-272-7114. The examiner can normally be reached on Monday-Friday (6:30 AM-3:00 PM).
